

# STUDENT VERSION (DevOps-Week-4)

---

CLARUSWAY  
WAY TO REINVENT YOURSELF

## Meeting Agenda

---

- ▶ Icebreaking
- ▶ Questions
- ▶ Interview/Certification Questions
- ▶ Coding Challenge
- ▶ Video of the week
- ▶ Retro meeting
- ▶ Case study / project

# Teamwork Schedule

---

## Ice-breaking

5m

- Personal Questions (Stay at home & Corona, Study Environment, Kids etc.)
- Any challenges (Classes, Coding, AWS, studying, etc.)
- Ask how they're studying, give personal advice.
- Remind that practice makes perfect.

## Team work

10m

- Ask what exactly each student does for the team, if they know each other, if they care for each other, if they follow and talk with each other etc.

## Ask Questions

15m

### 1. How can we rename a branch ? (git)

- A. git checkout -b new-branch-name
- B. git branch checkout new-branch-name
- C. git branch -m new-branch-name
- D. git clone new-branch-name

### 2. Can we run Junits as a part of Jenkins job?

- A. True
- B. False

### 3. How can we setup Jenkins jobs?

- A. Select new item from the menu
- B. After that enter a name for the job and select free-style job
- C. Then click OK to create new job in Jenkins
- D. The next page enables you to configure your job
- E. All of these

### 4. The command to create Kubernetes service is \_\_\_\_\_.

- A. kubectl expose
- B. kubectl set service

- C. kubectl run
- D. kubectl deploy

**5. Which command is used to create a new deployment in kubernetes?**

- A. kubernetes set deployment
- B. kubernetes get deployment
- C. kubectl run
- D. kubectl deploy

## Interview/Certification Questions

20m

**1. A company requires an open-source system for automating the deployment, scaling, and management of containerized applications. Which of the following would be ideal for such a requirement?**

- A. Use the Amazon Elastic Container Service for Kubernetes.
- B. Install a custom orchestration tool on EC2 Instances.
- C. Use SQS to orchestrate the messages between docker containers.
- D. Use AWS Lambda functions to embed the logic for container orchestration.

**2. Your company has a legacy application that uses the monolithic architecture. You need to design a new microservices architecture for the application and host it in AWS. The application should be dockerized so that it can be easily deployed.**

**Which of the following AWS services would you choose to host the application?**

- A. Elastic Kubernetes Engine
- B. Amazon Lambda
- C. Elastic Container Registry
- D. Elastic Container Service

**3. You have launched an ECS cluster with 5 EC2 instances with its task definitions. However, ECS is not getting any status information back from the container agent in each ECS instance. What could be the reason? (choose 3 options)**

- A. IAM role used to run ECS instance does not have ecs:Poll action in its policy
- B. Key-pair information is missing in ECS cluster.
- C. ECS Instance security groups' outbound rules are not allowing traffic to ECS service endpoint
- D. Interface VPC endpoint is not configured for ECS service.
- E. You are running ECS on t2.micro instance type which is not supported.

#### 4. What is a pod in Kubernetes?

#### 5. Do all of the nodes have to be at the same size in your cluster? (kubernetes)

### Video of the Week

10m

- [A Guide to the DevOps Technical Interview](#)

### Retro Meeting on a personal and team level

10m

Ask the questions below:

- What went well?
- What could be improved?
- What will we commit to do better in the next week?

### Coding Challenge

5m

- [Coding Challenge: Morse Translator](#)

### Case study/Project

10m

- [Project-204: Docker Swarm Deployment of Phonebook Application \(Python Flask\) with MySQL](#)

### Closing

5m

-Next week's plan

-QA Session

---
